## MEMORANDUM OF OBJECTS AND REASONS

The existing legislative framework for the regulation of building activities in the Island is outdated and impedes the effective regulation and development of a modern building sector. A modern legislative framework is particularly urgent and relevant to reduce the vulnerability of the built environment and ensure public safety and welfare, minimize damage caused by natural and man-made hazards, prevent squatter settlements and promote sustainable development.

The Government has, therefore, decided to establish a modern framework for the built environment by making new provisions for the regulation of the building industry.

Consequently, the Bill seeks to—

- (a) facilitate the legal adoption and efficient application of international building standards comprising a series of regulations for different categories of building work to be called the National Building Code of Jamaica for ensuring safety in the built environment, enhancing amenities and promoting sustainable development;
- (b) specify the regulatory and enforcement responsibilities of Local Authorities, the Chief Engineering Officer and other building officials;
- (c) confirm the Bureau of Standards as the standards making body for the building industry and specify the functions of the Bureau of Standards in relation to buildings and building work;
- (d) the requirement of a building permit and other authorization for the carrying out of building work;
- (e) streamline the permit application system to eliminate of unnecessary referrals and expedite responses;
- (f) facilitate the introduction of special express services;
- (g) to recognize the relevant provisions of the *Jamaica National Heritage Trust Act* which require that the Trust be consulted before structures of historical value are demolished, and that the demolition be undertaken by qualified personnel and be done to specific standards;
- (h) ensure the rights of persons with disabilities regarding accessibility, suitability, safety and user-friendliness of all buildings to which these persons may be invited or have a right of access;
- (i) the need to address the current deficiencies in respect of providing proper sanitary facilities in public and private buildings to which the public has access;

- (j) require building professionals to submit plans or designs that are in compliance with the National Building Code; and
- (k) repeal the *Kingston and St. Andrew Building Act* and the *Parish Councils Building Act*.
